

# Is Corporate America Ready for Open Source Software?

Beth Foss  
Dan McCreary  
Vladan Pulec  
Litao Zhang

University of St. Thomas MBA Program

Dr. David Walonick

# Agenda

---

- Origins of Open Source
- Background on Technology Adoption
- Using Statistics to Guild IT Strategies
- Survey Design
- Responses
- Results

# 1970...UNIX Was Free... But with Strings Attached...

---

Ken Thompson

Dennis Ritchie

# 32 Years Later...Still Geeks

---

but the world of software has evolved....

# Richard Stallman

---

- Frustrated that he could not freely use AT&T source code
- Started the GNU Project
  - GNU
  - Is Not
  - UNIX

# Philosophy of Open Source

- “Use the Force  
– Read the  
Source”
- Revenue from:
  - Installation
  - Customization
  - Training
  - Support

# Linux

---

Linus Torvalds

- First popular truly Open Source operating system
- Manages all the critical resources of your computer
- Competes with Microsoft Windows
- 100% Free
- Open Source popularity rises

# Stock Value of VA Software

Va Software Corporation  
as of 18-Apr-2002

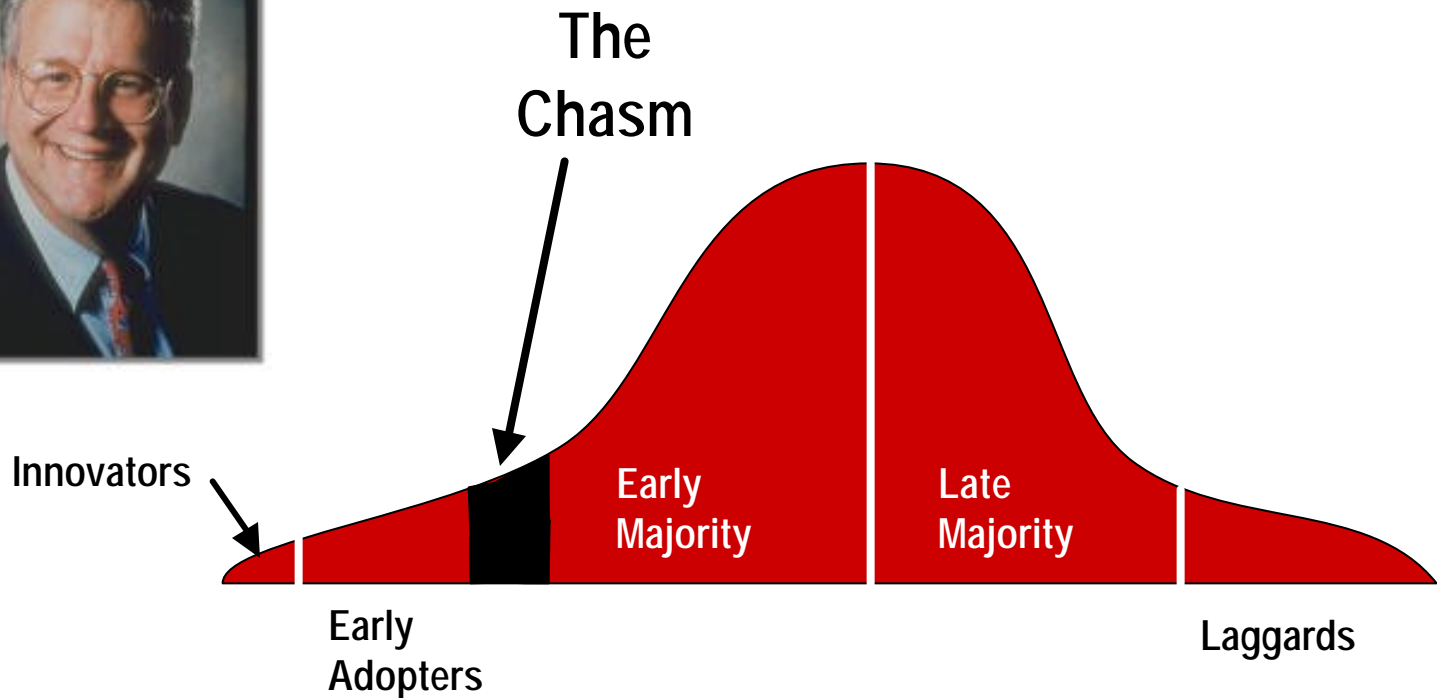

# Technology Adoption

Geoffrey Moore

Technologies that fail to cross the chasm fail to reach critical mass.

Open Source Survey

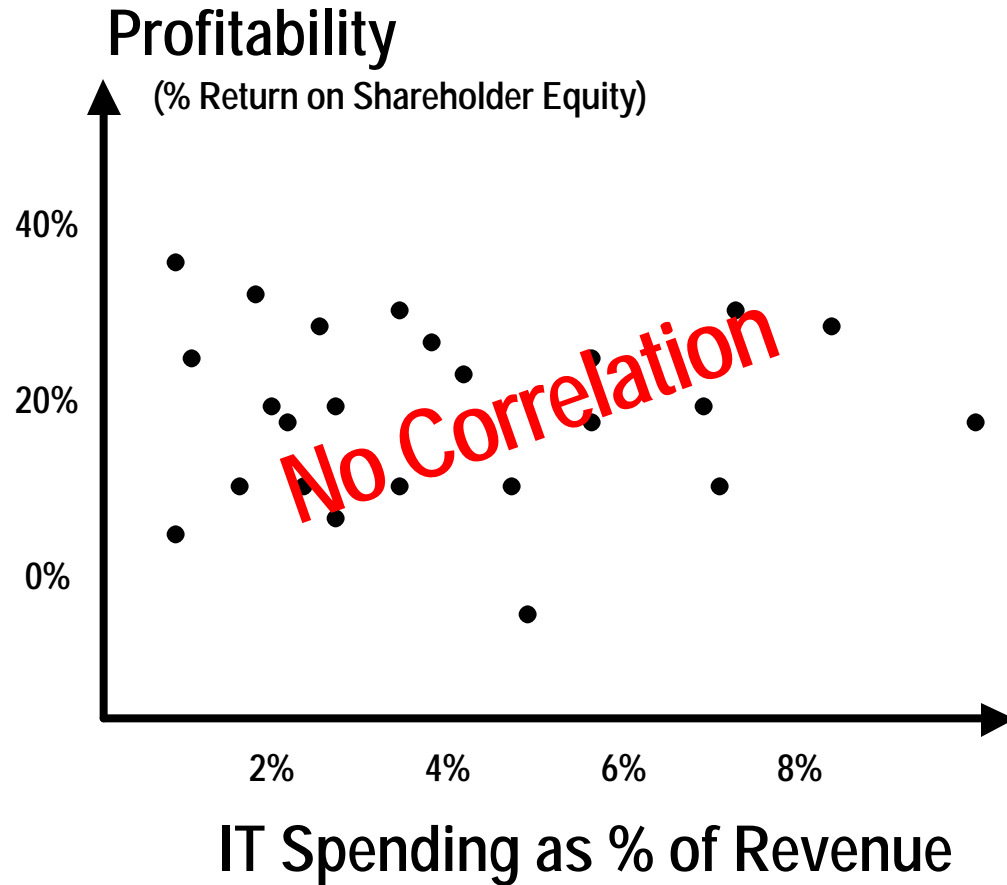

# FUD Factor

---

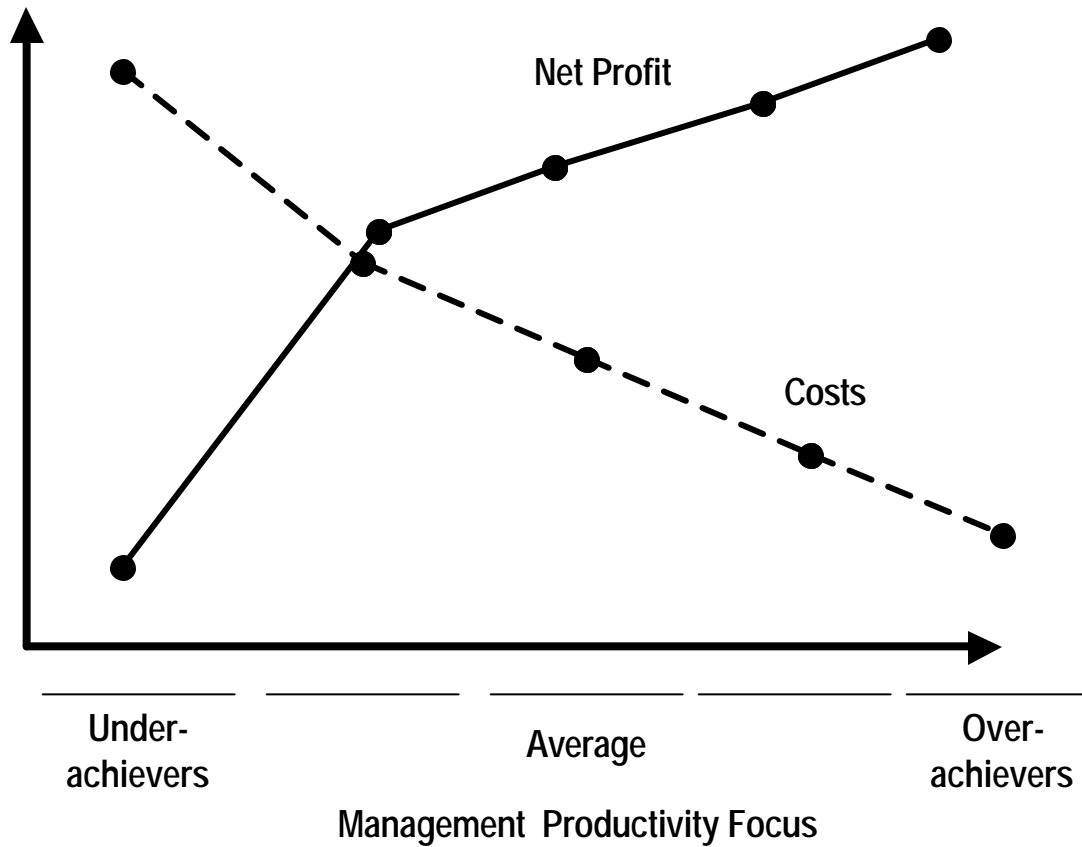

- FUD: Fear, Uncertainty and Doubt
- Old: “You never get fired for buying an IBM”
- New: “You never get fired for buying Microsoft”
- Question: Will you get fired for investing in Open Source?

# Paul Strassmann

# Net Profit and Productivity

# The Challenge

- A low percentage of IT professionals know their company profitability expressed as shareholder RIO and also know their their IT budgets as expressed as percentage of revenue
- Many would not be willing to share this data in a survey

# Solution

---

- Focus on observations of attitude, peer attitudes and company willingness to try Open Source software.
- Ask IT professionals why they resist adopting a new technology.

# Good News about Open Source

---

- Low evaluation cost
- Easy to “kick the tires”
- Easy to trace down problems (if you have the expertise)
- Low risk for non-critical systems

# Early Days of Open Source

---

- Hard to install
- Poor documentation
- Lack of training and support
- Compatibility issues
- Many versions
- No single point of coordination

# Resources

---

- Excellent Advisor
- Personal Contacts
- StatPac for Web Surveys
- StatPac for Analysis
- Student Time
- Budget Drivers
  - Convenience Sampling
  - Send e-mail requesting friends fill out a web survey

# Approach

---

- What questions can you ask in a 2 minute survey?
- 13 questions
- Two questions on attitude
- Focus on key concerns using semantic differential scales – parametric data
- Company Size
- One Open-ended question

# Key Concerns - Factors

---

- Security
- Value
- Reliability
- Documentation
- Ease of Use
- Support
- Training
- Installation

Dear IT Professional,

You have been selected to participate in a very important survey on the use of Open Source software for mission-critical applications. The sponsor of this study is the University of St. Thomas Graduate School of Business.

The survey will take less than two minutes. It is completely anonymous and your participation is voluntary.

[http://www.statpac.com/host/Open\\_Source.htm](http://www.statpac.com/host/Open_Source.htm)

The result of this research project will be posted at the following location the week of May 13, 2002.

<http://www.statpac.com/statclass/OpenSource.htm>

<http://www.statpac.com/statclass/OpenSource.rtf>

<http://www.statpac.com/statclass/OpenSource.ppt>

Thank you for your participation.

Dan McCreary

Vladan Pulec

Litao Zhang

Beth Foss

# Sample E-mail

Note: This survey is being conducted as part of a graduate course in statistics at the University of St. Thomas. The instructor for this class is David Walonick, Ph.D. If you have any questions about this research or if you would like any additional information, please contact Dr. Walonick at (612) 925-0159. You may also contact the University of St. Thomas Institutional Review Board at (651) 962-5341.

## IS CORPORATE AMERICA READY TO ADOPT OPEN SOURCE SOFTWARE?

Please complete this survey.

**To what degree do you think corporate America is ready to consider Open Source software alternatives for mission-critical applications?**

Not Ready

Ready

**To what degree is your company ready to consider Open Source software alternatives for mission-critical applications.**

Not Ready

Ready

**How secure is Open Source Software?**

Very Secure

Not Secure

**How cost effective is Open Source Software?**

Very Cost Effective

Not Cost Effective

**How reliable is Open Source software?**

Very Reliable

Not Reliable

# Responses

---

- Surveys sent out to 112 people
- Spectrum of known Open Source evangelists and Microsoft fans
- Survey closed up after 6 days
- 77 respondents = 67% response rate
- 13 long, open-ended responses

# Analysis

---

- Descriptive Analysis
  - Mean, median, standard deviation
  - Kurtosis
  - Kolmogorov-Smirnov
- Frequency Analysis
- Stepwise Regression
- Factor Analysis
- Open-ended question analysis

# Results

**Table 1 – Descriptive Statistics**

<b>Question</b>	<b>Mean</b>	<b>Median</b>	<b>Std. Dev</b>
<b>To what degree do you think corporate America is ready to consider Open Source software alternatives for mission-critical applications?</b>	<b>2.78</b>	<b>3</b>	<b>0.97</b>
<b>To what degree is your company ready to consider Open Source software alternatives for mission-critical applications.</b>	<b>3.32</b>	<b>3</b>	<b>1.39</b>
<b>How secure is Open Source Software?</b>	<b>2.51</b>	<b>2</b>	<b>1.02</b>
<b>How cost effective is Open Source Software?</b>	<b>1.9</b>	<b>2</b>	<b>0.84</b>
<b>How reliable is Open Source software?</b>	<b>2.18</b>	<b>2</b>	<b>0.84</b>
<b>How well documented is Open Source software?</b>	<b>2.82</b>	<b>3</b>	<b>1.05</b>
<b>How easy is it to use Open Source software?</b>	<b>2.64</b>	<b>2.5</b>	<b>0.87</b>
<b>How well supported is Open Source software?</b>	<b>2.77</b>	<b>3</b>	<b>1.02</b>
<b>How available is training for Open Source software?</b>	<b>3.22</b>	<b>3</b>	<b>0.83</b>
<b>How easy is it to install Open Source software?</b>	<b>2.68</b>	<b>3</b>	<b>0.93</b>
<b>How many employees work at your company?</b>	<b>7,777.43</b>	<b>36.5</b>	<b>39,651.4</b>
